dolphin@likethemammal.com

Web development lead with advanced experience working with large-scale Javascript apps and PHP backends. Specialized in rendering and DOM performance.

Professional:

Peerfit (*Product Team Lead, Fullstack Developer*) Mar '15 - Present

- Lead the development and maintenance of the product by remotely coordinating a team of developers, designers, and QA.
- Reviewed all pull requests to the codebase and created **DevOPs** solutions for testing **Git** branches before deployment.

Peerfit (*Fullstack Developer*) Nov '14 - Mar '15

- Setup a CSS and JS build system from scratch using **Node.js** and **AMD** for modules.
- Migrated the codebase from PHP templates to a Javascript web app using **React** and **Flux** to manage state.
- Created a **RPC** architecture for the front-end to consistently make AJAX calls and get preloaded page data.

Plex Media Player (*Javascript Developer*) June '14 - Oct '14

- Maintained a **Backbone** and **Marionette** media player app with several other remote developers.
- Regularly used **Grunt** and **JSCS** code standard checker as part of the workflow and build process.
- Remotely debugged specific complications with browsers on iOS and Android.

Grooveshark (*Front-End Engineer*) April '13 - May '14

- Fixed bugs across 3 different platforms with 15 other front-end developers using **Git** version control and **Github** to maintain productivity.
- Managed payments system written in PHP for thousands of regular subscribers and hundreds of new subscribers each month, with **Stripe**, **Paypal**, and promo code integrations.
- Built a media player prototype for the **Chromecast** platform while working within the limits of the technology.

Skills and Specialties:

Front-end
